```
/* Senior Website Developer - Jagex Ltd, Cambridge */
```

```
#employment #jagex {
    right: 'Present';
    left: 2010;
    content: 'Self Management - This job requires a lot of self management; a typical day to day scenario would be I would be tasked with solving a problem or creating a new section of a website. I would time cost the project initially and based on that estimate, it would then be up to how I manage my time as to whether I reached that deadline or not which would then impact major game releases and updates. Initiative - This job required a lot of initiative because I had to code in my own style but keep a global style so that my team would know how to update it if I were on another project. It also involved working closely as a team and a lot of technical skill as well as a steep learning curve, including many programming languages, some of which I learnt as I did the job as there were a few in-house languages.'
```

```
/* Web Application Developer - Red Gate Software, Cambridge */
```

```
#employment #redgate {

```

```
/* Lead Website Developer - Xcite Digital Ltd, Farnham */
```

```
#employment #xcite {
    right: 2010;
    left: 2009;
    content: 'Project Management - Taking control of bespoke website projects from start to finish, ranging from small startup company websites and branding to worldwide media sharing websites with thousands of visitors a day.'
```

Programming Frameworks - In depth knowledge of frameworks and libraries such as the JavaScript library; JQuery, Prototype and powerful PHP frameworks such as Symfony.'

```
/* IT Support - University of Western England, Bristol */
```

```
#employment #support {
```

```
    right: 2009;
```

```
    left: 2008;
```

```
    content: 'Problem Solving - The most important skill needed for this job was problem solving because it was extremely important to create a solution quickly and move onto the next problem as there were thousands of students and staff to support in the faculty. It was common place not to know the solution straight away but have to think of one on the spot.
```

```
    Work Flow Management - It was essential to plan my work according to severity of the issue. The way in which I went about fixing the issues presented was up to entirely up to myself and that meant deciding what needed to be done and when.'
```

```
}
```

```
/* Stock Replenishment & Control - Sainsbury's, Chippenham */
```

```
#employment #support {
```

```
    right: 2007;
```

```
    left: 2004;
```

```
    content: 'Leadership - This job requires me to take responsibility of others most of the time as on most days I would be in control of the department and dedicate certain jobs to certain people in my team, also helping them with their problems and making sure the department ran as smoothly as possible.
```

```
    Initiative - Working on the General Merchandise department at Sainsbury's means I am left to problem solve and come up with ways to deal with different situations on the spot, dealing with electrical faults, reductions, customer queries and complaints.'
```

```
}
